# Order Management & Supply Solutions — Project Summary

Author: Preetham KS   Generated: 2025-09-16

Objective: Monitor demand vs forecast, track PO lifecycle, and detect supply disruptions.
Tools: SQL, Excel, Power BI. Dataset: forecast vs actual, purchase orders, interruptions, inventory snapshot.
Key KPIs: Forecast Accuracy, PO On-Time %, Delayed PO Count, Inventory Coverage Days.

Highlights:
- Built dashboards to flag delayed POs and vendors for escalation.
- Wrote SOP and SQL queries for KPI computation and exception h
- Recommended automation: Alerts for delay, days > 7 and Forecas
